

Vehicle Data Collection Form

Analysing Campus Commute Safety

Name:

Date:

Direction:

[illegible]

Variable descriptions:

Time:	The time of the vehicle's data collected to the nearest five minutes.
Category:	The vehicle type. See key for details of each category.
Occupancy:	The number of people on the commute. Buses are estimated as a percentage of total occupancy, other vehicles are given a discrete number.
Visibility:	The colour of the vehicle or the prominent colour of the commuter.
Turn Signal:	Whether the driver indicated a turn into/away from the university. This is an additional measure for safety.
